1 INTRODUCTION

ABC INOAC Exterior Systems Inc. (AIES) is a manufacturer of auto plastic parts for OEMs. The production of exterior auto parts involves painting, in which certain toxic substances are used as formulation component in the process. AIES has developed toxic substance reduction plans in accordance with Toxic Reduction Plan Act and Ontario Regulation 455/09 and implemented feasible reduction options. AIES manages toxic reduction plans as part of the ISO 14001 based Environmental Management System. We understand toxic reduction will be an ongoing effort and will continually team up with our suppliers to eliminate or reduce the use/release of the toxic substances from the paint line, wherever feasible.

This annual toxics substance accounting report has been prepared to meet the regulatory obligations specified in Section 10 of the Act and has been prepared in accordance with the requirements of Section 27(1) of Ontario Regulation 455/09.
